

Our school: ITET Mantegna

Sganzerla Giorgia, Vasconi Karina

From an old abandoned factory...

The new Mantegna school was built within the area where the abandoned "Ex Ceramica" building, the only factory in Mantua at the beginning of the 20th century, was located.

The new structure, therefore, was born from an important Urban Regeneration intervention. The works carried out have in fact completely restored and recovered the listed property to convert it into the new Andrea Mantegna Technical, Economic and Technological Institute.

School addresses

- healthcare technologies
- environmental technologies
- economic
- fashion and design

Laboratories: microbiology

Laboratories: chemistry

Projects

All students and teachers have the opportunity to participate in Erasmus projects organized by the school in collaboration with schools from other countries or with foreign companies. These projects offer the opportunity to learn about the culture, language and traditions of the countries you visit
