I am **Anthony**, in France there are differentiated bins at home, in the street but not at school. In my secondary school, there are two sections where sorting and ecology are important. I saw that in schools in Ireland there are bins every 10m. So I'm going to create a project to implement these differentiated bins in my secondary school.

I am **Franca** I teach law and economics in secondary school in Italy. I will bring my experience in Ireland talking to my students of the Irish history of independence using collaborative learning .

I am **Adele**, I teach Biology in a secondary school in Italy. This experience is very important for me, I have more information about the natural environment. In classroom I will do a project about lichen recognition.

I am **Agnese**, I am an Italian teacher of textile technology. I will introduce my students to how wool is produced by the sheep of Aran Island and used for clothing and accessories.

I am **Ermana**, I teach chemistry in Italy. I'll explain to my students Guinness beer's fermentation process and I'm planning to share this experience with them in the laboratory.

Our names are **Efstathia** and **Panagiota**. We are teachers in a primary school in Greece. It was a wonderful educational week. We very much loved meeting colleagues from other countries and sharing knowledge and information. We would be happy to continue our cooperation after this project.
